

HORIZONTAL (UNDER SILL) UNITS

Comfortable room heating and demand-based ventilation in schools, kindergartens and meeting rooms

The ready-to-use, decentralised SCHOOLAIR-B and FSL-B units create an inducing displacement flow and use pumped hot water and pumped chilled water for heating and cooling.

SCHOOLAIR-B

Large air volumes as particularly required in schools, kindergartens and meeting rooms

FSL-B-ZAB

Ideal for offices

These variants have already been successfully used for various projects:

- FSL-B-SEK (secondary air only)
- FSL-B-ZUL (supply air only)
- FSL-B-ZUS (supply air + additional secondary air)
- FSL-B-ZAS (supply and extract air + additional secondary air)

Special requirements? Give us a call! We have solutions!

For design details, have a look at our Decentralised Ventilation brochure 

FIND OUT MORE

Would you like to know more about decentralised ventilation? Here's more information, ready for download:

- Façade ventilation systems for new and refurbished offices, schools and children's daycare facilities (brochure)
- Variety at a glance (overview)

The brochure gives you all the background information, while the overview helps you select the unit that best meets your requirements.
