

TROX[®] TECHNIK

The art of handling air

7 June 2016

Air distribution technology for modern offices The TROX guide to modern solutions

When we talk about the office of the future, one of the concepts we discuss is IEQ, or indoor environmental quality. Over the past few decades TROX has gained much experience in office buildings and cooperated with the most creative and best engineers and architects to develop bespoke ventilation and air conditioning strategies that ensure a perfect climate in each office. These development efforts have resulted in sustainable solutions that increase the well-being of people working in offices.

For an overview of these solutions please have a look at the new TROX brochure 'Fresh air for offices – Innovative room air strategies create ideal working conditions'.

The new brochure 'Fresh air for offices' is available for download from www.troxtechnik.com; if you prefer a hardcopy, just send an e-mail to cm@trox.de.

By example of two buildings, one new and one refurbished, the TROX brochure explains how rooms can be equipped with different room air conditioning products and systems. Follow the way of the airflow through the office buildings from the air handling unit to the air terminal devices.

Press Release

TROX is leading in the development, manufacture and sale of components, units and systems for the ventilation and air conditioning of rooms. With 28 subsidiary companies in 28 countries on 5 continents, 14 production facilities, and importers and representatives, TROX is present in over 70 countries. Founded in 1951, global market leader TROX, whose international head office is in Germany, generated in 2015 with a total of 3,700 employees around the globe revenues of €482 million.
