

RESIDENTIAL VENTILATION

TROX KWL – THE SYSTEM

SAFE SOLUTION, ADDED VALUE

Residential ventilation with effective heat recovery does not only improve a building's energy efficiency. It also helps to permanently lower operating costs, which makes a building more attractive and maintains its value, while the **comfort** increases.

Once again TROX **defines a new standard** – with very quiet, compact systems.

X-CUBE X2 COMPACT AIR HANDLING UNIT

X-CUBE compact air handling units possess the outstanding features of the innovative X-CUBE in the smallest of spaces

- Volume flow rates of 900 to 15500 m³/h
- Heat recovery efficiency of more than 80% (to EN 308)
- FAN optimiser function to be used with EHS

TROX RESIDENTIAL AIR CONTROL UNIT

The compact and whisper quiet residential air control unit is ideal for individual flats in a block of flats.

- 3-stage automatic mode with volume flow rate control via X-CUBE
- 3 control options: manual, with schedules or based on VOC

TROX FIRE DAMPERS

- Prevent the spreading of hot fire smoke in the event of a fire
- Mechanical (automatic) or electronic release

PREMIUM QUALITY AIR TERMINAL DEVICES

A clever air distribution system and attractive air terminal devices complete the TROX solution.

- Made of sheet steel, powder-coated, rectangular or circular
- Easy-to-clean air terminal devices for wall or ceiling installation
