rubric
products

In the very sensitive areas of medicine, biology, pharmaceuticals and food processing, clean room terminal filters ensure extremely clean air and hence the cleanliness of products and successful processes.

TROX TFP clean room terminal filters, which are available for air cleanliness classes 5 to 8, have been optimised to allow for an even easier and more rapid filter change. Filter panel mounting is easier than ever before with the new turn clips. Nothing hinders in situ measurements since the entire filter area is completely accessible even when installed. The new turn clips press the filter panel firmly against the sealing surfaces and ensure its secure seating.

TFP clean room terminal filters are designed to accommodate Mini Peat filter panels, which are fitted with a downstream fluid seal and hence meet the most critical hygiene requirements.

TFP pharmaceutical clean room terminal filters – Advantages at a glance

- › Easy, swift and and secure filter change
- › Entire filter area accessible for filter testing
- › Hinged diffuser face plate, fixed by magnets, to facilitate cleaning and testing, no tool required for filter change
- › Robust, welded construction, very compact and hence suitable for low ceilings and suspended ceilings
- › Meets the hygiene requirements of VDI 6022
