overview](#)

date	rubric
15.07.2014	company / press

The TROX Easy Product Finder has been an indispensable tool in the building services engineering industry for many years.

Users can quickly access the product structure and select products, easily add and change project items, use the integrated product search for quick sizing, navigate the system with the interactive room wizard, and hence get reliable results in no time. For each project the bill of material can be created and exported – including all selected products with their principal technical data. Individualists can configure their own work space and adapt it to their requirements. Shortcuts let users work faster.

The new EPF 2.2 includes a whole new range of products, which can be accessed with the proven intuitive navigation functions:

- TJN jet nozzle
- X-GRILLE ventilation grilles
- WG external weather louver
- JZ-S multileaf damper
- TROXNETCOM products
- X-CUBE compact accessories

In addition, the room wizard for air terminal devices has been improved, new compact bills of material have been integrated, and price groups have been extended to include new products. And finally, specification texts can be exported as GAEB files.
