

TROX @ ISH 2017

overview

date	rubric
09.02.2017	press

Increasing urbanisation is accompanied by a need to constantly adapt buildings to changing use. Integrated ventilation and air conditioning systems which respond to changing requirements in real time are a sensible choice. They ensure the provision of the required air quality on demand as well as maximum building safety, and then independent of the building type or usage.

Safe, energy-efficient and environmentally friendly products and systems, which are perfectly complimentary to one another, create an indoor climate that is conducive to the well-being of people. The integration of components and systems, the creation of networked worlds, is the focus of TROX and TROX X-FANS at ISH (hall 11.0, booth B51). From individual single room control systems to the central management level, they provide a suitable solution to meet every requirement.

Is this THE TROX PRINCIPLE? Discover new products and systems! Let's talk about new trends in our industry! – We are looking forward to seeing you.

For more information on ISH go to: www.ish.messefrankfurt.com

TROX is leading in the development, manufacture and sale of components, units and systems for the ventilation and air conditioning of rooms. With 27 subsidiary companies in 27 countries on 5 continents, 14 production facilities, and importers and representatives, TROX is present in over 70 countries. Founded in 1951, global market leader TROX, whose international head office is in Germany, generated in 2016 with a total of 3,700 employees around the globe revenues of nearly €500 million.
