TROX at the ISH
Technology for people

The TROX focus at the ISH (hall 11.0, booth B51) is once again people and their needs. Together with its customers, TROX develops solutions for people's maximum comfort and well-being in all kinds of rooms. Numerous product highlights and technological innovations are the result of this close cooperation and will be presented at this year's ISH under the motto 'Technology for people'. The ISH takes place from March 12-16 in Frankfurt/Main, Germany.

The enhanced X-CUBE air handling units and the X Fans building fans by TROX TLT GmbH are just two of the more than 20 new products that are further steps on the TROX way to provide its customers with the entire system of ventilation and air conditioning components from a single source.

Discover technology for people!
We look forward to seeing you!

Your TROX Team
