AS-EM/C

## AS-EM/C

CAN BE USED TO CONTROL 2 FIRE DAMPERS WITH SEPARATE POWER SUPPLY, TO CAPTURE THE DAMPER BLADE POSITIONS, FOR EXAMPLE IN FIRE DAMPERS WITH CONVENTIONAL LIMIT SWITCHES, AND TO CAPTURE SIGNALS FROM DUCT SMOKE DETECTORSÖSEEINRICHTUNGEN

The module is used to connect the control system with the components

- Integral AS-Interface slave
- Monitoring of signal receipt
- With short circuit protection
- Easy wiring due to flat cable insulation displacement connectors ('click and go')
- Certified motor control modules for safe communication up to SIL2
- Special modules for dampers with special functions including redundant voltage supply
- Universal module for the connection of various terminal units such as fire dampers, smoke protection dampers or duct smoke detectors

## Application

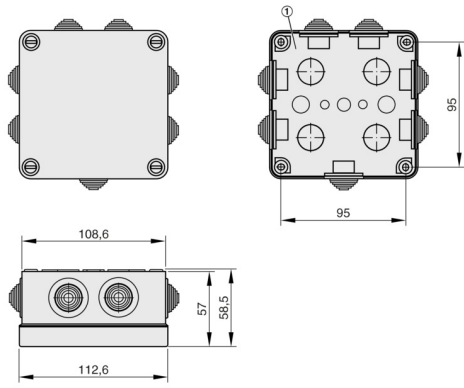

### Application

- Universal module with plastic casing
- Can be used to control 2 fire dampers with separate power supply
- Can be used to control the explosion-proof actuator for a fire damper
- Can be used to control the actuator for a KA-EU fire damper with blade opening actuator
- Can be used to capture the damper blade positions CLOSED and OPEN, for example in fire dampers with conventional limit switches
- Connection of up to four dampers with one limit switch each, or two dampers with two limit switches each
- Can be used to capture signals from duct smoke detectors of Type RM-O-VS-D or RM-O-3-D
- Integral AS-Interface slave
- Monitoring of signal receipt
- Voltage supply for actuators with separate 24 V or 230 V AC voltage supply
- Cable connection with terminal strip
